Experience

Axis Bank

June 2024 – Present

Deputy Manager – IT Strategy & Infrastructure

- Lead enterprise strategy and planning initiatives for Infrastructure Resilience and Disaster Recovery, aligning execution with organizational objectives and leadership priorities.
- Present weekly strategic reviews to CIO and CISO, covering progress, risks, dependencies, and forward-looking roadmaps to enable data-driven decisions.
- Own RCSA and thematic assessments, delivering fortnightly and monthly management dashboards to MD and senior leadership.
- Act as a strategic liaison between infrastructure, security, application, and leadership teams, translating technical data into executive-ready insights.
- Design and govern management, regulatory, and executive reporting frameworks, ensuring 100% accuracy and on-time delivery.
- Lead RBI and internal audit engagements, preparing evidences, walkthroughs, and responses, achieving zero major audit observations.
- Develop and institutionalize SOPs, governance models, and standardized processes, improving audit readiness by 30
- Define and manage end-to-end BCDR strategy for 600+ critical applications, ensuring compliance with ISO 22301 and RBI regulations.
- Conduct Business Impact Analysis (BIA) and enterprise risk assessments, validating RTO/RPO and improving recovery prioritization accuracy by 25%.
- Plan and govern 300+ Disaster Recovery drills, improving drill success rate and reporting turnaround by 20%.
- Own capacity and execution planning through a centralized quarterly DR calendar, reducing scheduling conflicts and delays by 35%.
- Lead automation and AI-driven transformation, integrating chatbots and intelligent workflows to eliminate external dependencies and reduce manual intervention by 45%.
- Deliver automation-led reporting solutions using Power Automate and SharePoint, reducing manual reporting effort by 40%.
- Apply advanced data analysis techniques using Excel and SQL to identify trends, control gaps, and optimization opportunities.
- Improve data accuracy and consistency across reports by 30% through validation rules and automated checks.
- Lead incident war-room operations during high-impact infrastructure events, reducing recovery coordination time by 25%.
- Serve as Domain Owner for internal DRM platforms, managing access controls, audit trails, and compliance with 100% adherence.
- Champion continuous improvement and training initiatives, increasing process compliance and stakeholder adoption by 30%.
